

Bulk Biologicals

Boca Biolistics can provide bulk plasma, serum and urine for use in manufacturing controls and calibrators as well as development of panels for internal use related to research development. We strive to become a long term provider to our customers. We offer:

- Bulk Plasma from 100-800mL per unit and up to 100L pooled
- Bulk Serum from 50mL-300mL per unit and up to 100L pooled
- Urine from 10-100mL per collection or up to 100L pooled
- Defib and Delip services available on all plasma units

Some of the markers we provide in bulk:

- HIV-1 (various subtypes)
- HIV-2
- HBsAg (various GT and subtypes)
- HCV (various GT)
- RPR
- ToRCH (IgG, IgM)
- Rheumatology Markers (SSA, SSB, etc.)
- Endocrine Markers (TgAb, TPO, etc.)
- Cardiac Markers
- 'Normal' negative sera

If you do not see the marker you are looking for on this list, please let us know. Please contact a Boca Biolistics representative to discuss your bulk material needs.

Boca Biolistics - one of the nations fastest growing bio-logistic services companies – has the people, global resources and know-how to respond quickly to our IVD and pharmaceutical clients' toughest logistical challenges related to clinical trial collection kit assembly and distribution.

Boca Biolistics is a highly specialized bio-logistics company serving the IVD and bio-pharmaceutical industries. We focus on development, assembly and storage of collection kits for human clinical trials as well as offer logistical support to deliver these kits to your collection sites, globally. Through our network of suppliers and transport companies, Boca Biolistics offers unparalleled service to our clients. We offer custom collection kit design, assembly and shipping through our online project generation software, Biolistics OnlineTM. We also offer biologicals for research and clinical trial services.

Additional information about Boca Biolistics may be obtained from the Company's website at www.bocabio.com.
