

Research Samples

Boca Biolistics, under its BocaStor division, sells biological raw materials consisting of human serum, plasma, urine and tissue. Boca Biolistics obtains its biological raw materials through Boca Bio-managed and partnered collection sites. The Company collects biological samples under IRB/IEC approved protocols as well as IRB/IEC waived protocols.

Boca Bio collects samples for use in research and development applications as well as complete IVD Clinical Trials collections. If your research or trial requires the procurement of biological samples, Boca Biolistics is a trusted source for your biological sample needs.

- Biological samples are drawn by clinicians who are part of the Company's collection network, received and processed trained technicians and stored in monitored freezers.
- Biological samples are stored at Boca Bio's Bio-Repository facility in Ft. Lauderdale at temperatures as cold as -80°C .
- Every sample is procured under IRB approved/waived protocol.
- Research samples are accompanied with demographic information and single point test data.
- Samples available from several to thousands.

Boca Bio 's line of biological raw materials are used in infectious disease, genomic, and other research applications and in the testing and development of IVD test kits. Boca Bio 's sample bank includes rare biological raw materials as well as 'routine' sera. Boca Biolistics also offers bulk biological material for use in manufacturing.

Boca Biolistics - one of the nations fastest growing bio-logistic services companies – has the people, global resources and know-how to respond quickly to our IVD and pharmaceutical clients' toughest logistical challenges related to clinical trial collection kit assembly and distribution.

Boca Biolistics is a highly specialized bio-logistics company serving the IVD and bio-pharmaceutical industries. We focus on development, assembly and storage of collection kits for human clinical trials as well as offer logistical support to deliver these kits to your collection sites, globally. Through our network of suppliers and transport companies, Boca Biolistics offers unparalleled service to our clients. We offer custom collection kit design, assembly and shipping through our online project generation software, [Biolistics Online™](#). We also offer biologicals for research and clinical trial services.

Additional information about Boca Biolistics may be obtained from the Company's website at www.bocabio.com.
