

# The Boca Biolistics Introduction

Boca Biolistics offers a full suite of products and services through three specialized divisions, Clinical Sample Collection Services (CSC), Custom Collection Assembly & Logistics (BocaNet) and our inventory of biological material for research (BocaStor).

**CSC** operates as a specialized clinical research organization (CRO) for the IVD industry. We provide a full suite of clinical trial management services for the development of new diagnostic technologies from protocol development and IRB submission to ICF and CRF design. CSC has the capability to collect from a wide range of patient populations, globally.

**BocaNet** offers customers access to our custom collection assembly and logistics service from study design assistance to assembly of collection kits and logistical support. We can custom design, build and deliver from as little as 1 kit to thousands and handle all distribution and shipping of the collected material to its destination. BocaNet is one of the core services we offer.

Through **BocaStor**, Boca Biolistics offers rare and esoteric biological material for use in R&D and clinical trials. Using our bio-storage database, we can access thousands of samples with the click of a mouse.

## MISSION STATEMENT

- Meet and exceed our clients expectations
- Provide the highest level of customer service
- Continually improve our systems
- Become a long term partner to our customers

**Boca Biolistics - one of the nations fastest growing bio-logistic services companies – has the people, global resources and know-how to respond quickly to our IVD and pharmaceutical clients' toughest logistical challenges related to clinical trial collection kit assembly and distribution.**

**Boca Biolistics is a highly specialized bio-logistics company serving the IVD and bio-pharmaceutical industries. We focus on development, assembly and storage of collection kits for human clinical trials as well as offer logistical support to deliver these kits to your collection sites, globally. Through our network of suppliers and transport companies, Boca Biolistics offers unparalleled service to our clients. We offer custom collection kit design, assembly and shipping through our online project generation software, Biolistics Online<sup>TM</sup>. We also offer biologicals for research and clinical trial services.**
