

**CLAS New England Chapter Report
10 May 2007**

The New England Chapter of the Clinical Ligand Assay Society is pleased to announce that our regional meeting: The 21st Annual Northeast Region Conference and Exhibition was a great success. We had two symposia on topics of Immunoassay and Unannounced Lab Inspections. Sixteen individual sessions arranged into four educational tracks were also held. Attendees came from all over New England to attend this CLAS-CLMA-AACC co-located meeting. Sixty-eight exhibit spaces were sold—a record! Over 25 volunteers donated both time and effort to make this such an outstanding event. Registration, education, vendor, brochure, hotel and publicity committees combined forces to do a remarkable job!

Many individuals visited our dedicated convention web site and saw our ads in CAP TODAY, CLP and Advance for Medical Laboratory Professionals. A new web site for the conference was recently unveiled. We hope to build awareness and attract more attendees and vendors with our updated presence on the web. Planning is underway for our 2008 event.

Membership in the Clinical Ligand Assay Society and the 2007 National Meeting were heavily promoted at the meeting. All attendees received National Meeting brochures and membership applications in their NERCE registration packages. Our CLAS exhibit booth was located across from the registration table.

Please mark your calendars for 15-16 April 2008 for the 22nd Annual Northeast Region Conference and Exhibition.

Respectfully submitted,
SFC Eric Sigillo MS, MBA
CLAS New England Chapter President
Northeast Region Conference and Exhibition 2007 Chair
