### **HAMA PURIFIED, CROSS REACTIVITY**

HAMA purified from roller culture diluted to 1 µg/mL in PBS/BSA.

This was then mixed with a dilution series of animal IgG from 320 nM down, and incubated 48 hrs in the cold.

The mix was then added to ELISA trays coated with 1.5 µg/mL mouse IgG for 40 mins 37C

Then conjugate anti-human IgG at 1:5000 for 40 mins, 37C, followed by substrate for 15 mins.

Rat, Rabbit, Hamster, Guinea Pig, Human, Sheep, Goat did not inhibit ONLY mouse.
